MY PROJECTS

Calculatrip
Hacktive8, Februari 2022 Link: https://expo.dev/@rodhey48/calculatrip

Calculatrip is a mobile app made for people who like traveling, With calculatrip we can manage the amount of budget that we will spend. We can arrange the details of expenses so that we will not exceed the predetermined budget. With features such as maps and uploading photos and vacationing with our friends.

- Developed with a team of 5 people, I'm in charge of the backend responsible for creating CRUD for the user profile, where there are details of the user. Front end responsible expo and apollo
- Using javascript as programming language, postgres database, full rest api with express, jwt, bcryptjs, and deploy to Heroku, Frontend using React-native expo dan apollo client

All Movie
Hacktive8, Januari 2022 Link: https://p3-c1-movie-user.web.app/

All movie is a web application that provides currently airing movies, manually updated using a web CMS. here I learned to use the React library to work on the front end

- self-developed,   I'm in charge of the backend and front end.
- Using javascript as programming language. Backend using postgres database, full rest api with express, jwt, bcryptjs, and deploy to Heroku. Frontend using react redux react router bootstrap
- Have web CMS for crud database.

Badminto Lover
Hacktive8, Januari 2022 Link: https://badminton-lover.web.app
